1

Visit HostGator.com

Visit www.hostgator.com then click on the **big yellow button in the center**. There are thousands of different companies to get a website from, some are terrible and some are amazing, we think Hostgator is one of the best [check their reviews on google].

2 Choose A Plan

Next choose a plan. We like to go with the “Baby Plan” because it allows as many domain names [www.YourWebsite.com] as you want. I have about 7 domains on this plan. We also suggest going month to month so you aren’t locked into a contract. You get 45 days to cancel and 24 hour live chat. Once you have selected it click “Order Now”

The image displays three hosting plans side-by-side, each with a '20% OFF!' badge in the top right corner. The plans are:

- Hatchling Plan:** Starting at \$3.96/mo*. Features include: Single Domain, **UNLIMITED** Disk Space, **UNLIMITED** Bandwidth, and Shared SSL Certificate.
- Baby Plan:** Starting at \$6.36/mo*. Features include: **UNLIMITED** Domains, **UNLIMITED** Disk Space, **UNLIMITED** Bandwidth, and Shared SSL Certificate. A dropdown menu is open showing term options: 3 Years - \$6.36/mo*, 2 Years - \$7.16/mo*, 1 Year - \$7.96/mo*, 6 Months - \$7.96/mo*, and Monthly - \$7.96/mo* (highlighted in blue).
- Business Plan:** Starting at \$10.36/mo*. Features include: **UNLIMITED** Domains, **UNLIMITED** Disk Space, **UNLIMITED** Bandwidth, **FREE** Private SSL & IP, and **FREE** Toll Free Number.

Each plan includes a 'Compare All Hosting Plans' link and an 'ORDER NOW' button. A note at the bottom right states: '*Price reflects 20% off first invoice'.

3 Choose a Website Name

First enter in your desired website name where it says “Enter Domain Name:” then put in **CODESAVE25** where it says enter coupon code. This will save you 25% instead of the regular 20% coupon. Then click “Continue To Step 2”

Host Gator

LIVE CHAT

Thank You Larry Williams,

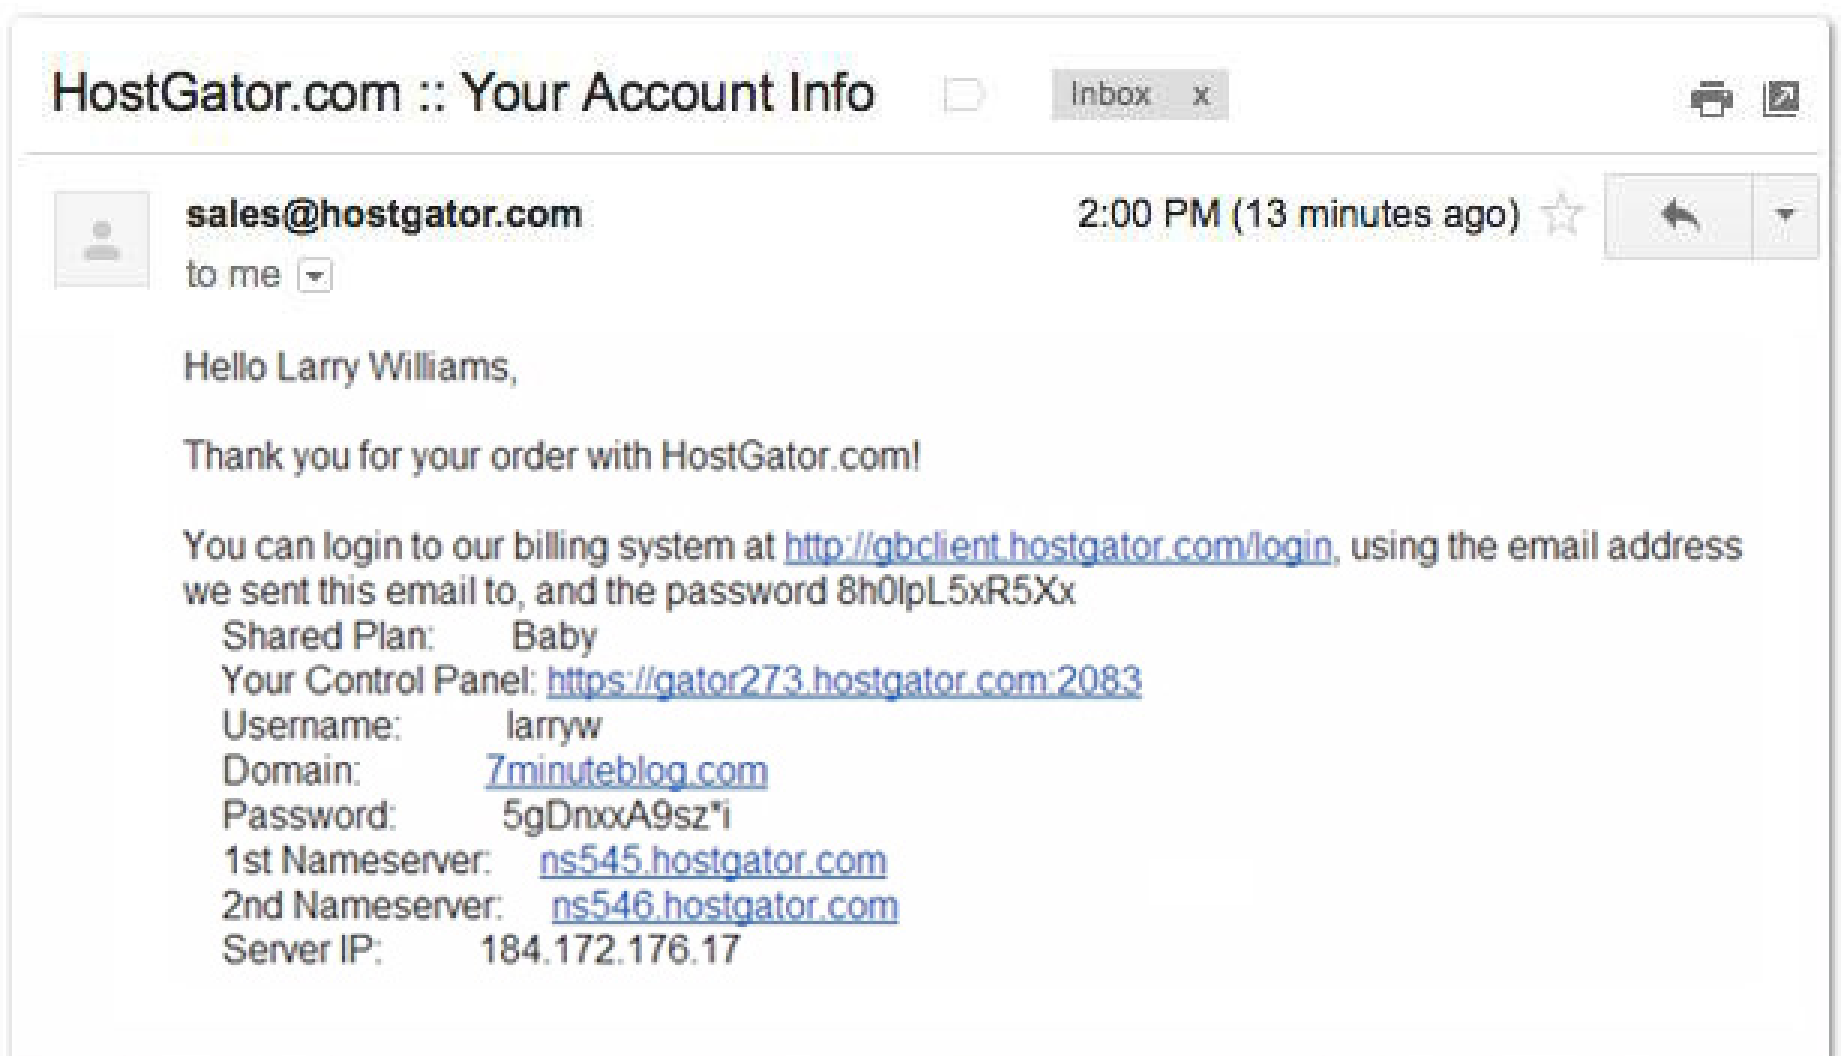

An email will be sent shortly to 7minuteblog@gmail.com containing the required information for using your Hosting Account.

Your reference number is R0I0Z2285830930

Check Your Email

You should see an email that looks like this one, make sure to keep this email it is important! Click on “Your Control Panel”.

7 Login

Copy the username and password from the email you received from Hostgator and login.

The image shows the cPanel login interface. At the top, the cPanel logo is displayed in a stylized orange and yellow font. Below the logo, there are two input fields. The first field is labeled "Username" and contains the text "larryw" next to a small user icon. The second field is labeled "Password" and contains a series of dots next to a small lock icon. At the bottom left of the form, there is a blue button with the text "Log in" in white.

9 Click WordPress

Click “WordPress” located on the left side [a] then click “Continue” located on the right side [b].

The screenshot shows the QuickInstall interface. On the left, there is a sidebar with categories: Billing Software (WHMCS), Blog Software (LifeType, WordPress), Calendar Software (k5n), Chat (Crashy, phpFreeChat, X7 Chat), and CMS Software (b2evolution, concrete5, Drupal 6, Drupal 7, e107, glFusion, Hotaru, Joomla). A hand cursor labeled 'a' points to the WordPress option under Blog Software. On the right, the WordPress details are shown: WordPress is web software you can use to create a beautiful website or blog. We like to say that WordPress is both free and priceless at the same time. Version: 3.4, Install Size: 16.37 MB, Official Site: http://wordpress.org/. A hand cursor labeled 'b' points to the Continue button.

WordPress

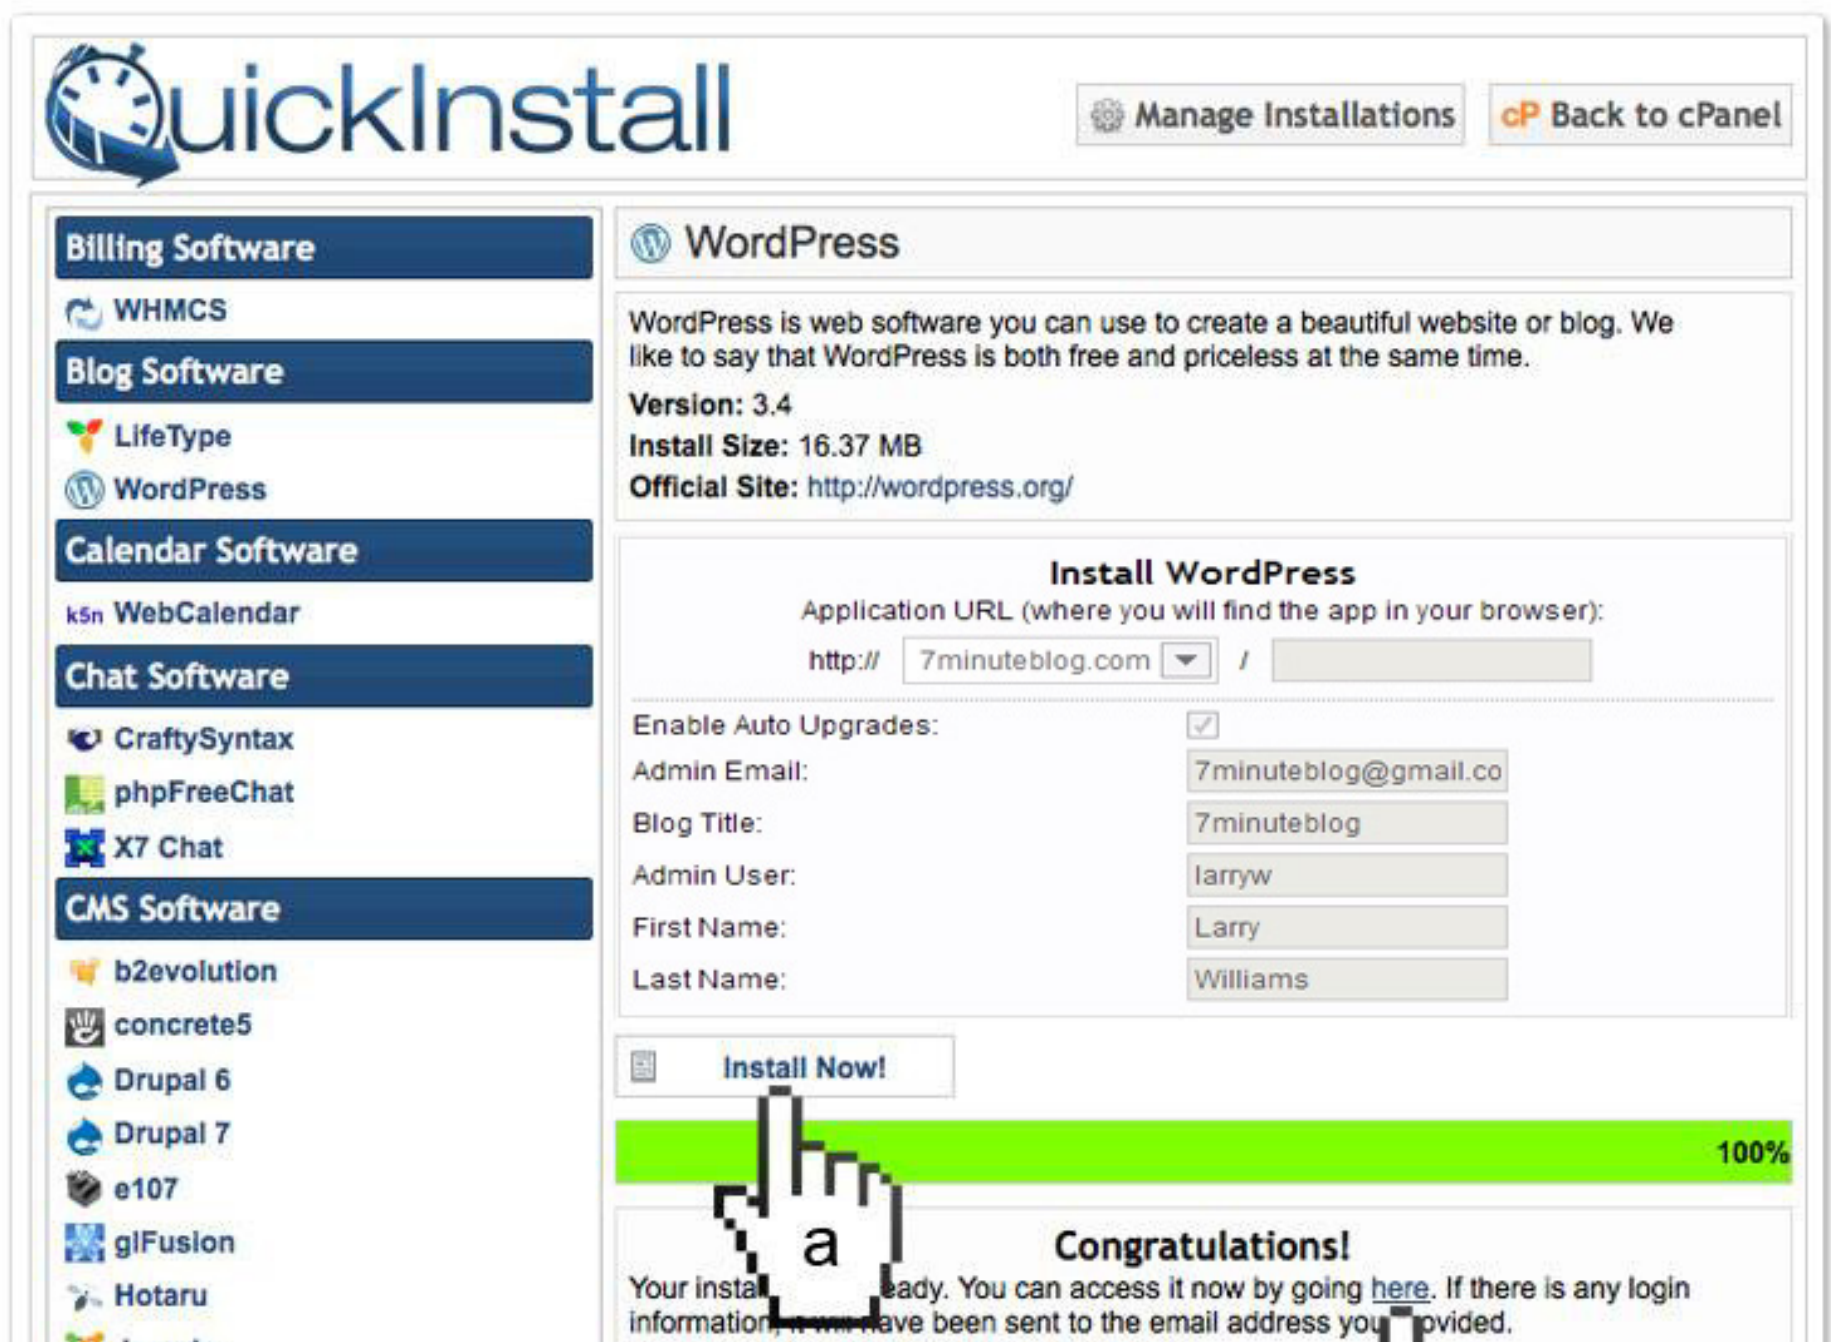

WordPress is web software you can use to create a beautiful website or blog. We like to say that WordPress is both free and priceless at the same time.

Version: 3.4
Install Size: 16.37 MB
Official Site: <http://wordpress.org/>

[Continue](#)

10 Install WordPress

On the right side where it says “Application URL” select your website. Then where it says “Admin Email” enter in your email address. Then put “admin” for your “Admin Username” and choose your blog title (you can change this later to what ever you want). Enter in your “First Name” and “Last Name” and click “Install Now” [a].

The screenshot shows the QuickInstall interface for installing WordPress. On the left, there is a sidebar with categories: Billing Software (WHMCS), Blog Software (LifeType, WordPress), Calendar Software (k5n WebCalendar), Chat Software (CraftySyntax, phpFreeChat, X7 Chat), and CMS Software (b2evolution, concrete5, Drupal 6, Drupal 7, e107, glFusion, Hotaru, Joomla). The main content area is titled "WordPress" and includes a description: "WordPress is web software you can use to create a beautiful website or blog. We like to say that WordPress is both free and priceless at the same time." It also lists the version (3.4), install size (16.37 MB), and official site (http://wordpress.org/). Below this is the "Install WordPress" section with the following fields: Application URL (http:// 7minuteblog.com /), Enable Auto Upgrades (checked), Admin Email (7minuteblog@gmail.co), Blog Title (7minuteblog), Admin User (larryw), First Name (Larry), and Last Name (Williams). A green progress bar at the bottom indicates 100% completion. A hand cursor is pointing at the "Install Now!" button. Below the progress bar, a "Congratulations!" message states: "Your installation is ready. You can access it now by going [here](#). If there is any login information, it will have been sent to the email address you provided."

11 Congratulations

Make sure to keep your “Username” and “Password” written down or copied to your computer. Now we must wait about 2 hours for the website to go live. We like to go outside and get some fresh air. When you come back click “here” [b].

The screenshot shows the QuickInstall interface for installing WordPress. On the left is a sidebar with categories: Billing Software (WHMCS), Blog Software (LifeType, WordPress), Calendar Software (k5n WebCalendar), Chat Software (CraftySyntax, phpFreeChat, X7 Chat), and CMS Software (b2evolution, concrete5, Drupal 6, Drupal 7, e107, glFusion, Hotaru, Joomla, liveSite, Mambo, Modx, Nucleus, ocPortal). The main content area is titled 'WordPress' and includes a description, version (3.4), install size (16.37 MB), and official site. Below this is the 'Install WordPress' form with fields for Application URL (http:// 7minuteblog.com /), Enable Auto Upgrades (checked), Admin Email (7minuteblog@gmail.co), Blog Title (7minuteblog), Admin User (larryw), First Name (Larry), and Last Name (Williams). A green progress bar shows 100% completion. A hand cursor labeled 'a' points to the 'Install Now!' button. Below the progress bar, a 'Congratulations!' message states the installation is ready, provides login credentials (Username: larryw, Password: Z0SiGx03FeA8wxKe), and includes a note about enabling automatic upgrades. A hand cursor labeled 'b' points to the 'here' link in the message. At the bottom, a note states: 'Note: If you enable Automatic Upgrades for your package please make sure to enable Automatic Upgrades under Manage Installations for your account.'

Your installation is ready. You can access it now by going [here](#). If there is any login information, it will have been sent to the email address you provided. You can log in with the following credentials:

Username: **larryw**
Password: **Z0SiGx03FeA8wxKe**

Note: If you enable Automatic Upgrades for your package please make sure to enable Automatic Upgrades under Manage Installations for your account.

12 Check Out Your Website

Now you have a website! It isn't that impressive but you saved yourself lots of money and it is a good starting point! Lets continue so we can make this website even better!

13 Login To Your Dashboard

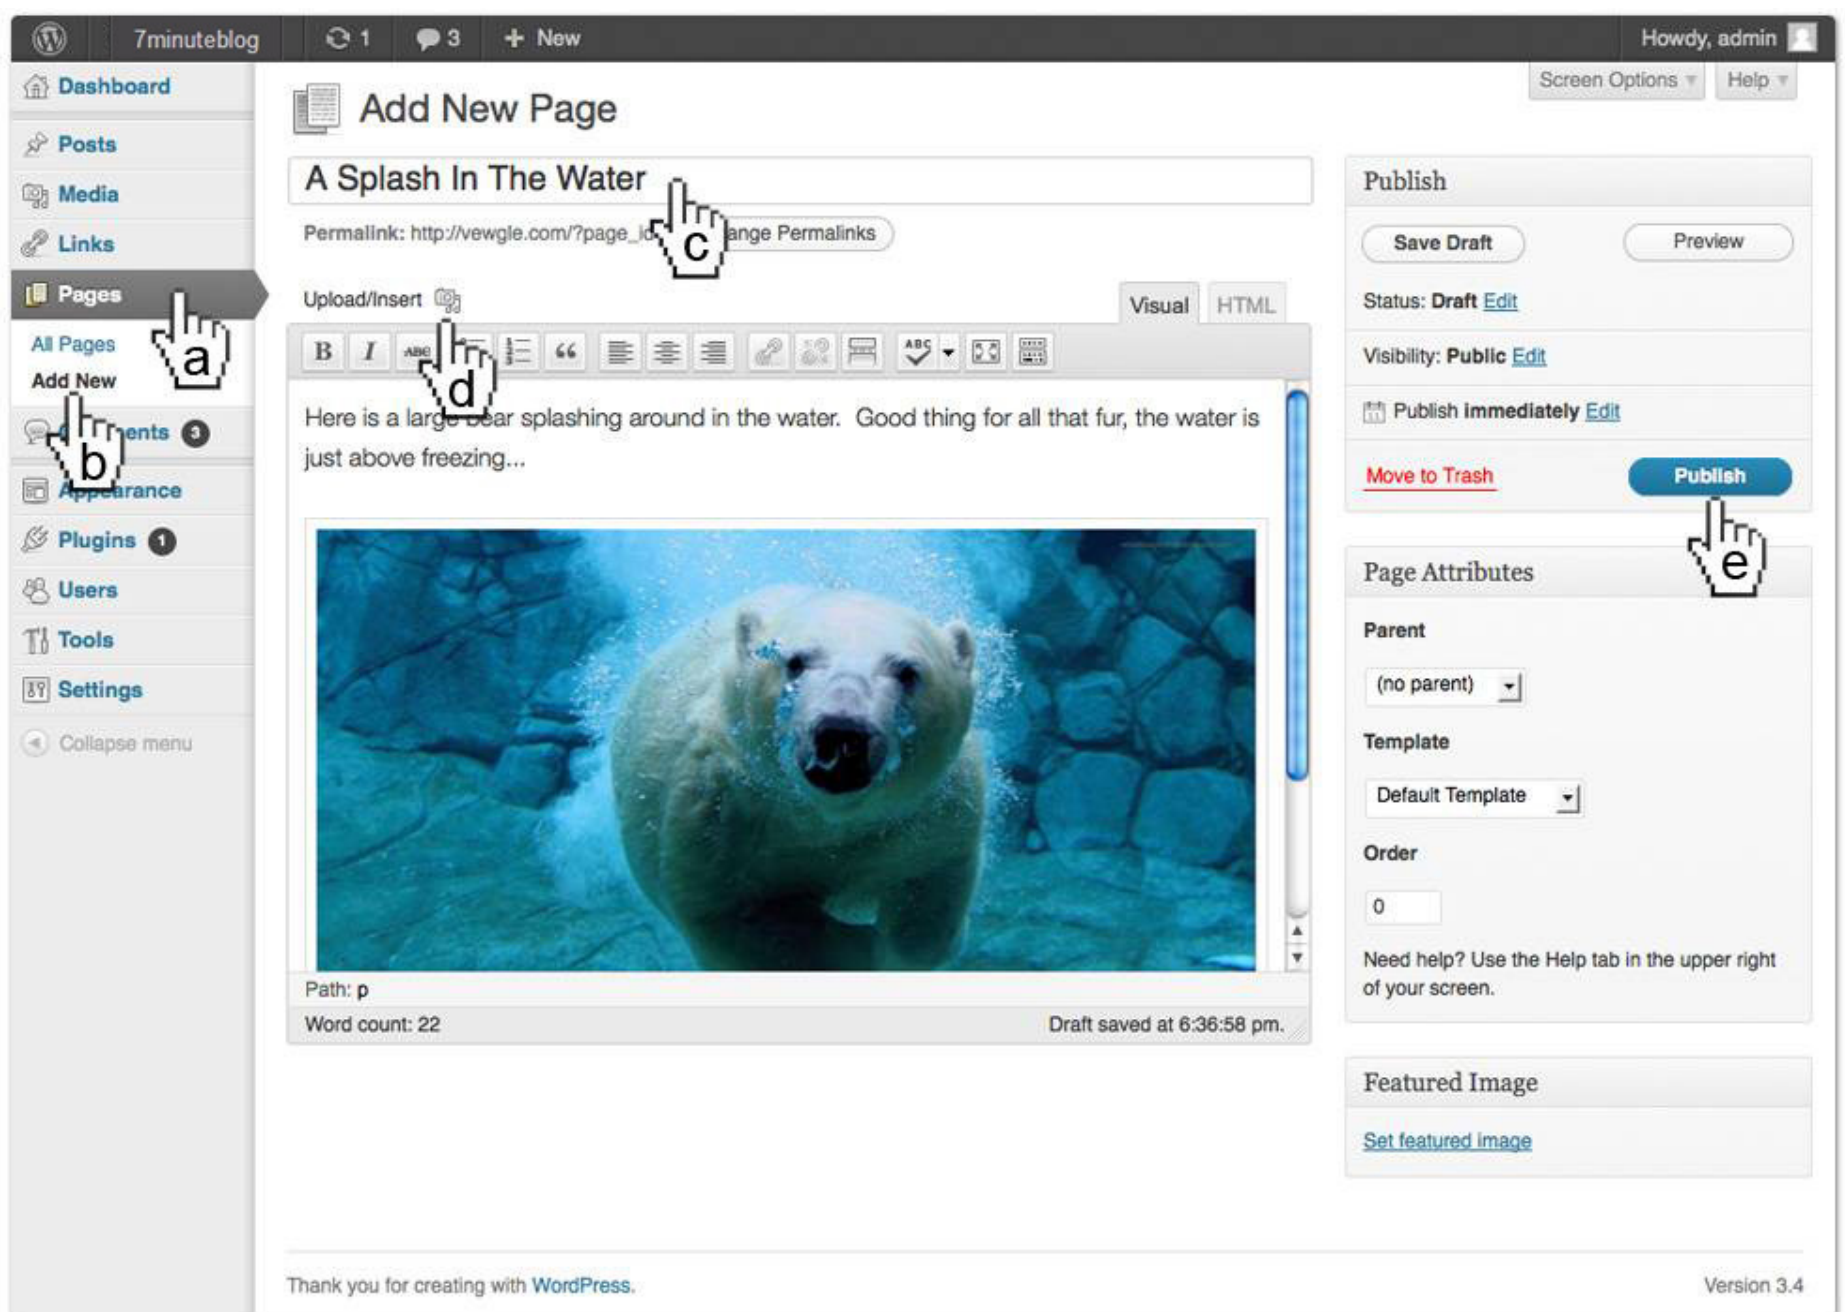

Now go to www.YourWebsite.com/wp-admin [a] then enter in your username and password from step 11 and click login [b]

14 Adding Pages

First click on “Pages” [a] then “Add New” [b] now enter in a title [c] and add in content and insert an image [d] after that click “Publish” [e]. Now your new page should show up on your website.

* To add a Post click on "Posts" and repeat instructions above.

The screenshot shows the WordPress dashboard for a user named 'admin'. The left sidebar contains a menu with 'Pages' highlighted, and 'Add New' is selected. The main content area is titled 'Add New Page' and shows the title 'A Splash In The Water' being entered. The text area contains the sentence 'Here is a large bear splashing around in the water. Good thing for all that fur, the water is just above freezing...'. An image of a polar bear is being inserted. The right sidebar shows the 'Publish' section with the 'Publish' button highlighted. The 'Page Attributes' section shows the parent as '(no parent)' and the template as 'Default Template'. The 'Featured Image' section has a 'Set featured image' link. The footer of the dashboard says 'Thank you for creating with WordPress.' and 'Version 3.4'.

Annotations on the screenshot:

- [a] Points to the 'Pages' menu item in the left sidebar.
- [b] Points to the 'Add New' link under the 'Pages' menu.
- [c] Points to the title input field.
- [d] Points to the text area and the image insertion button.
- [e] Points to the 'Publish' button in the right sidebar.

Congratulations!

You have setup your first Website !!!!
